vebrodeck Vitesse is a fast-cure polyurea deck wearing system with dynamic crack bridging capabilities (Class B4.2 –20°C) up to 0.8 mm designed for use on top decks of multi-storey parking structures.

vebrodeck Vitesse reduces the installation steps associated with top deck waterproofing systems to deliver a fully trafficable and weatherproof surface under a reduced turnaround.

Benefits

- Dynamic crack bridging according to EN 1062–7 class B4.2 (– 20°C)
- Offers a fast return to service
- Excellent resistance to thermal shock, movement and weathering
- Protects against oils, fuels and de-icing salts
- Excellent slip resistance profile

Applications

- External Car Park Decks
- Partially Exposed Decks
- Ramps & Turning Circles
- Loading Bays
